

VSD-4

Thermally Powered

Thermally actuated variable air volume diffuser uses proven wax bulb technology to modulate a damper from fully closed to fully open. Standard 10-year replacement parts warranty.

ISTA Certified Packaging

Packaging has gone through an extensive testing and certification process to ensure a higher level of product protection during shipping.

AHRI Certified Performance

Performance is rated in accordance with AHRI Standard 880-98 and Addendum. The VSD-4 is subject to independent, random testing to verify that the product performs to published data.

No Electrical Requirements

The heat from the supply air and space are used to modulate the diffuser. Absolutely no electrical service is required for diffuser operation.

Simplicity of Adjustment

No tools are required to remove the face and adjust the temperature setpoint. Cooling setpoint is adjusted by a clearly marked blue ring. Heating controlled by variable dependent offset.
